Notes	
1	Enumerator used initials PC, PR, AS, PE, PduM, and PI to designate concessions, both for the column *Concession* and in the column *Remarks* for estimating value of property. However, these initials have not been successfully equated with areas on 19th c. Maps, nor on modern maps. Hence the approximate center of the island was used for the entire subdistrict.
2	Newton has eight concessions or rangs. NewtonN includes Rangs 1 - 3, and NewtonS, Rangs 4 - 8, dividing the population of the township nearly equally. Newton was scarcely postulated in 1851.
3	Enumerator used the initials “R” and “C” for the column *Concession ou Rang*. The meaning of these initials has not been successfully equated with anything on 19th c. Maps. Hence, there is only one *Location* for the whole of Rigaud.
4	Enumerator for 1851 listed: Rangs 1, 2, 3, 4, or blank. *Location* assignment was determined by comparing names to 1871 Census, where the concessions are named, and with the aid of 19th century maps. Those with no designation are assigned to the village of St.-Clet. Note that the concession St.-Emmanuel has a part in both St.-Ignace as well as in St.-Clet.
5	In the Concession column in the manuscript, there is “1”, St. Emmanuel, and Ste. Anne, and “blank”. For “1” and “blank” Location is based upon Église St. Ignace in Coteau-du-Lac. The other Concessions were determined using 19th century maps (and the assistance of Michaël Dicaire, Centre d’Archives de Vaudreuill-Soulanges). Note that St.-Emmanuel is in both St.-Ignace and St.-Clet.
6	Determined by Michaël Dicaire, Centre d’Archives de Vaudreuill-Soulanges, and 19th c. maps showing concessions.
7	There is no Saint-Louis on the old maps, but the center of St.-Joseph is along Ch. Saint-Féréol, N of Quebec Autoroute 20
8	Used latitude and longitude of L’Église de Saint-Joseph-de-Soulanges in Les Cedres for this concession.
9	In 1851, only St.-Guillaume (St. William) and St.-Henri (St. Henry) were occupied; there were no occupants listed for Ste.-Marie or for Ste.-Julie concessions. Enumerators for Ste.-Marthe made a useful map that could be compared with other 19th century maps, and modern maps.
10	Named concessions usually initials, but placement unknown. So used approximate center of the SubDistrict
11	Determined by Michaël Dicaire of CAVS as Rang St.-Antoine
12	Determined by Michaël Dicaire of CAVS as probably Avenue Saint-Charles, in Vaudreuil-Dorion
13	Chenaux: Present day area known by the same name.
14	Determined by Michaël Dicaire of CAVS as possibly Chemin de l’Anse
15	Ste.-Catherine includes two additional concessions listed in the manuscript. First, Con O, where the assumption is that Con O = Ste.-Catherine Ouest. Secondly, Cote St. Antoine; Very few farms.
16	Enumerators for St.-Polycarpe spelled out the name of concessions, and 19th century maps and modern maps were used to determine the latitude and longitude.
